'Collective Impact'

Common Agenda

All participants have a shared vision for change including a common understanding of the problem and a joint approach to its solution through agreed upon actions.

Shared Measurement

Data collection and measurement of outcomes consistently across all participants to ensure efforts remain aligned and participants hold each other accountable.

Mutually Reinforcing Activities

The activities of participants may be different while still being tightly coordinated through a mutually agreed common plan of action.

Continuous Communication

Consistent and open communication amongst participants to build trust, assure mutual objectives and build common motivation.

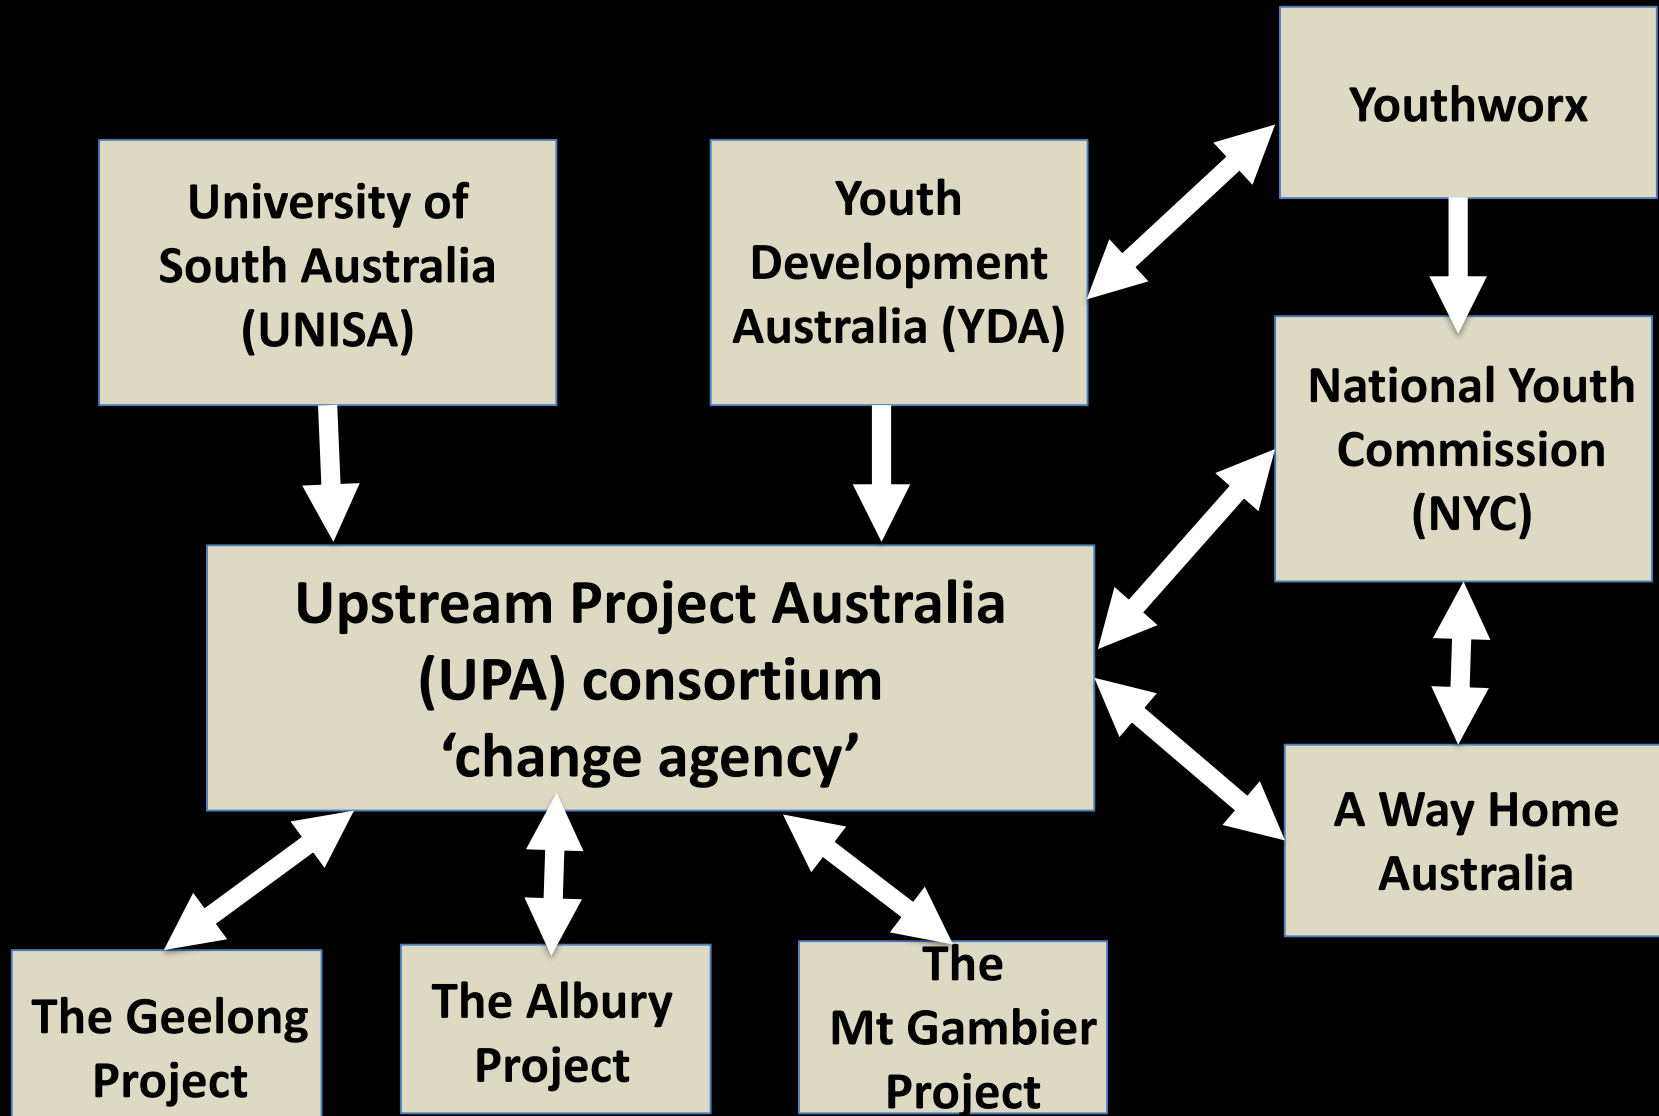

Backbone Support

A skilled staff and organisational form to build and manage the entire collective impact initiative by coordinating the participant organisations and activities.

Organising for change ...

The challenge is place-based system reform and a cross-sectoral approach
