# The New French Street Counts: Figures, Lessons and Perspectives

Marion Giovanangeli & Maxime Gennaoui

*14th European Research Conference on Homelessness  
Helsingborg, September 2019*

CENTRE  
D'ACTION SOCIALE  
VILLE DE PARIS

---

**01**

**Figures**

*Paris' 2019 count*

**02**

**Lessons**

*What we learned,  
what we launched*

**03**

**Perspectives**

*Objectives and proposals for comparable  
figures in France and Europe*

# A little bit of context: homelessness in Paris

- Paris: 2.1 M inhabitants (metropolis 6.7 M)
- 21,000 shelter beds and approximately 3,000 additional beds in the winter
- **Homelessness is on the rise for the last 20 years**, in all demographics ; street homelessness very visible ; but up until 2018 no reliable city-wide data
- Homeless services = national state’s jurisdiction, but moral and political responsibility of the City of Paris
- City has built coalition of partners around a plan to reduce street homelessness (2015)

# The 1st French Street Count: *la Nuit de la Solidarité* in Paris

**1<sup>st</sup> year: February 2018**

**2<sup>nd</sup> year: February 2019**

**3<sup>rd</sup> year: upcoming  
(January 30<sup>th</sup>, 2020)**

## **Our objectives**

- Snapshot of street homelessness
- Shared reference point for all
- Better knowledge of homeless persons
- Awareness / consciousness raising

## **Our methodology**

- City wide, street by street  
incl. the subway, train stations, hospitals, parking lots, etc.
- A headcount + a survey
- Target demographic: the unsheltered homeless  
= E1 category of the ETHOS typology
- Stakeholders: a steering committee, a scientific committee,  
numerous NGOs and 1500+ volunteers

# Methodology

## The Scientific Committee

- Who sits on it ?
  - Research institutions working on homelessness
  - Sociologists, demographers, cartographers, political scientists
- What does it do ?
  - Critical analysis of methodology used and recommendations for improvement
  - Oversees and approves production of streetcount results and final report

## Our dissemination strategy

- First estimates at D+30
- [Annual report](#) with all the data, maps, and scientific articles in October + an overview

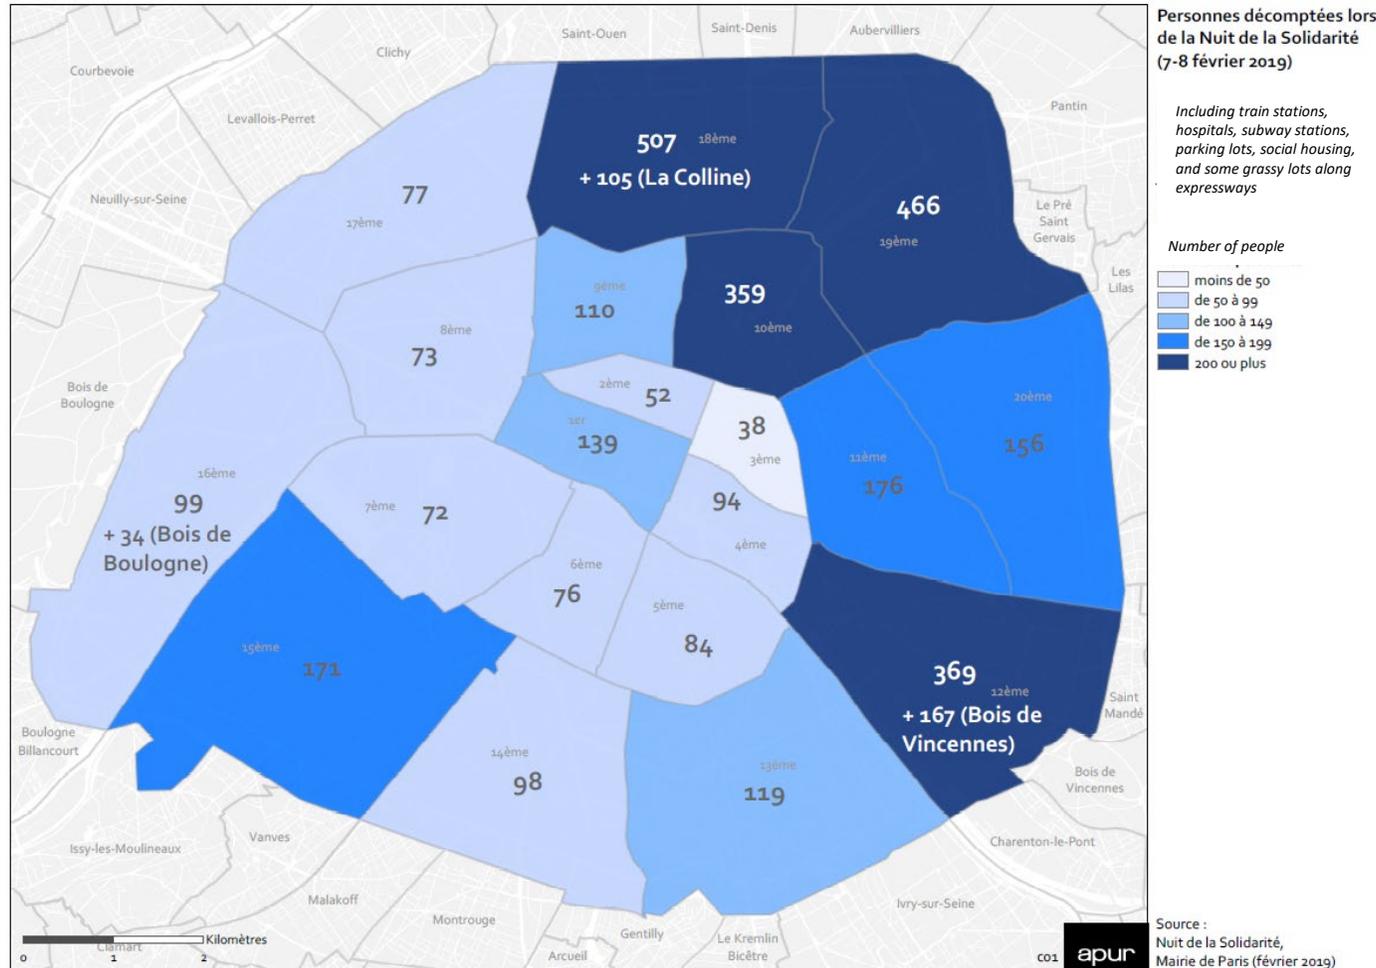

- [Fact sheets](#)
- [A recap video](#): the results in 3 minutes

**01**

**Figures**

# 1. There were 3,641 people sleeping rough in Paris on the night of February 7<sup>th</sup>, 2019

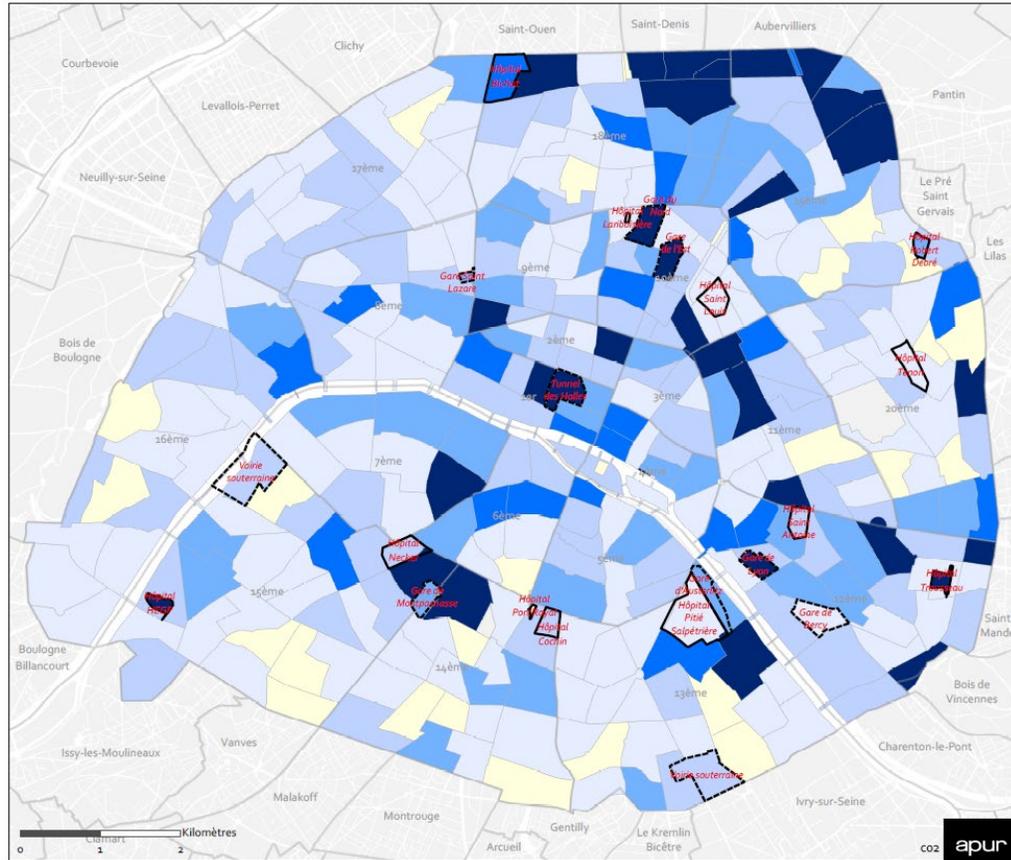

*In 2018, we counted 3,035 people*

*But we extended our perimeter this year: the number of roofless individuals is roughly similar for the same perimeter (3,258 people for 2019, that is +223 people ≈ +6%)*

*Overall, we find that the number of roofless people is statistically stable*

## 2. Homelessness is widespread in Paris

### Overground

People sleeping rough in Paris (February 7th/8th, 2019)

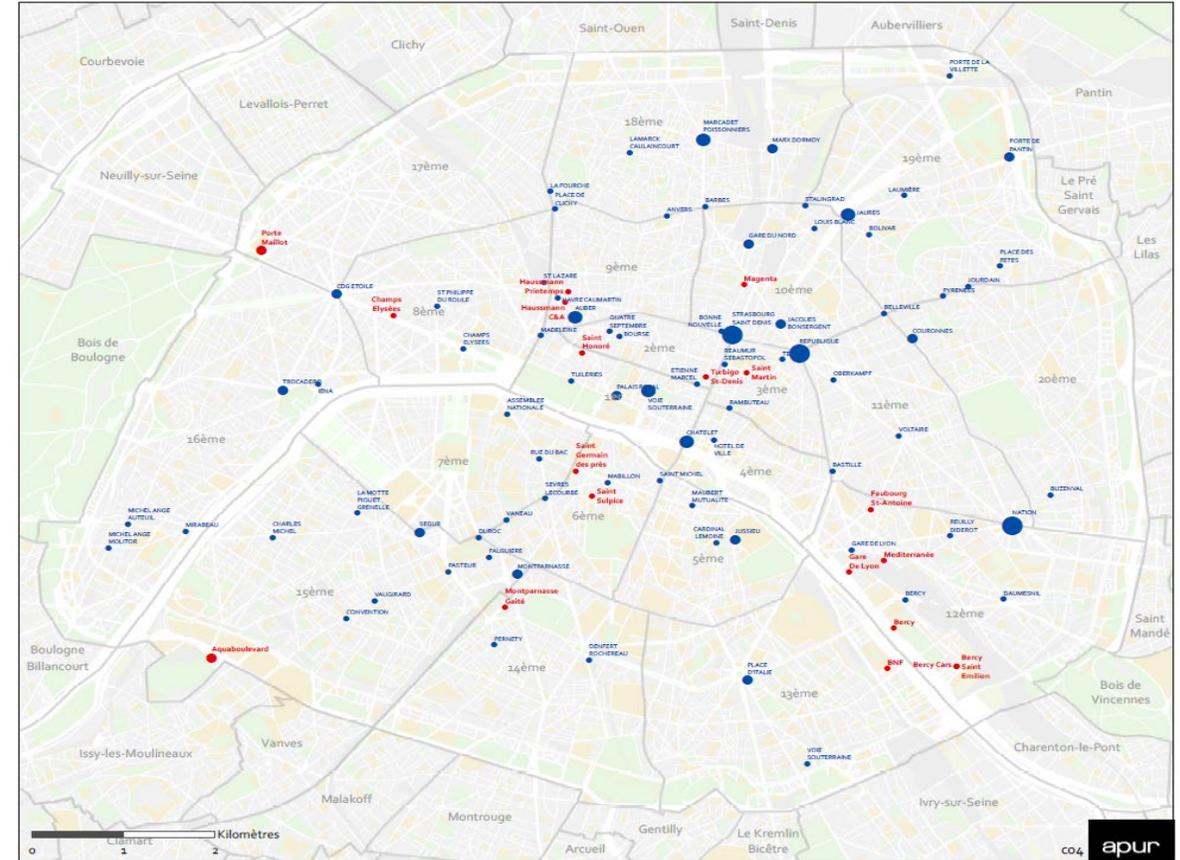

*incl. train stations, hospitals, subway stations, parking lots, social housing, and some grassy lots along expressways*

Nombre de personnes  
 aucune  
 moins de 5  
 de 5 à 9

de 10 à 14  
 de 15 à 19  
 20 ou plus

Zones spécifiques  
 hôpital  
 gare

### and underground (subway stations and parking lots)

Emplacement

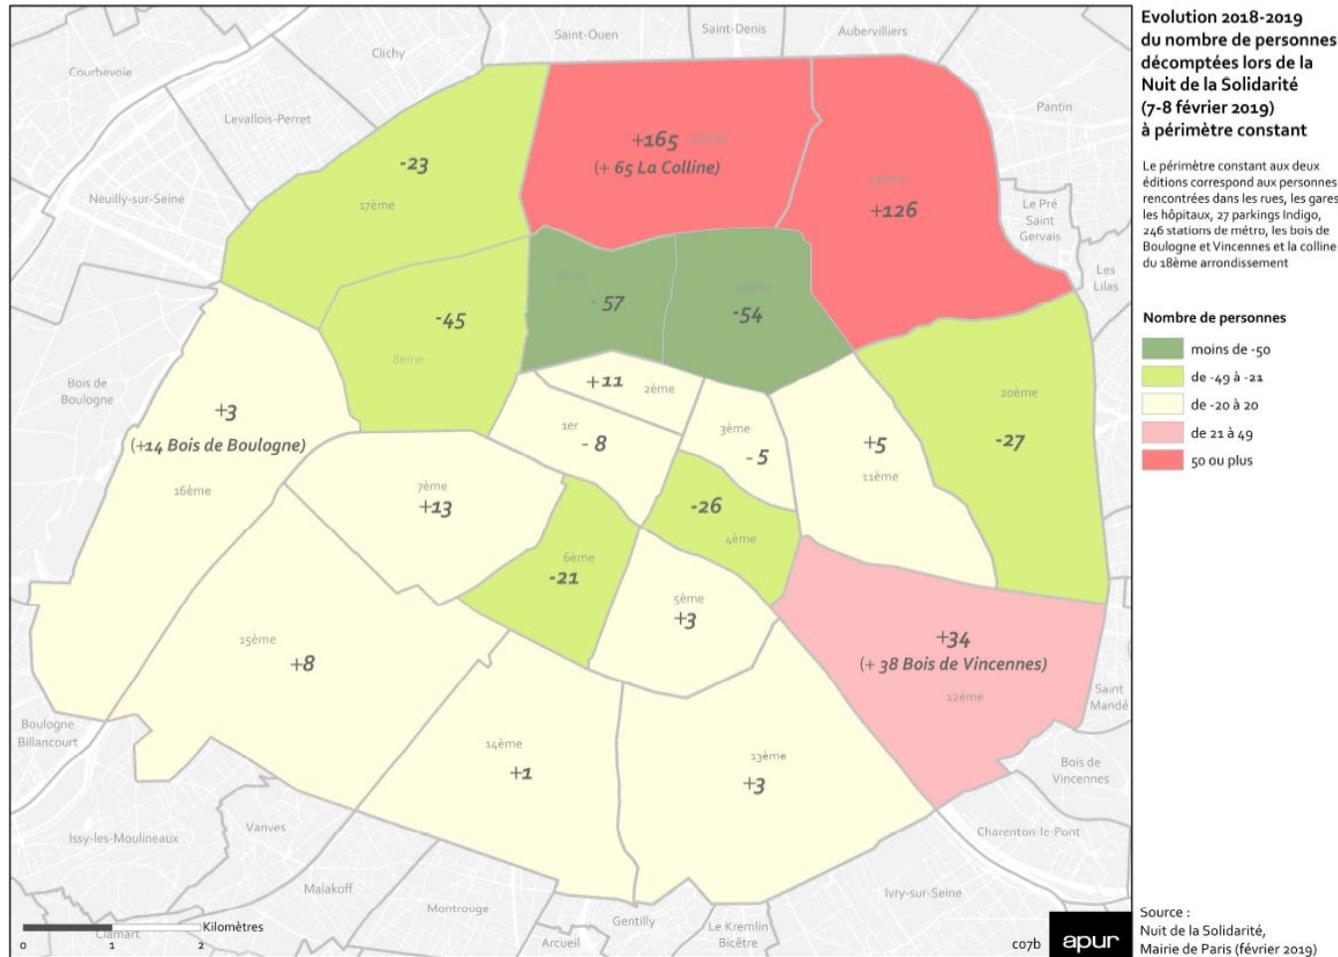

■ Parking lots

■ Subway stations

Nombre de personnes

● moins de 5  
 ● de 5 à 10  
 ● de 10 à 20  
 ● 20 personnes ou plus

### 3. Territorial shifts can be observed

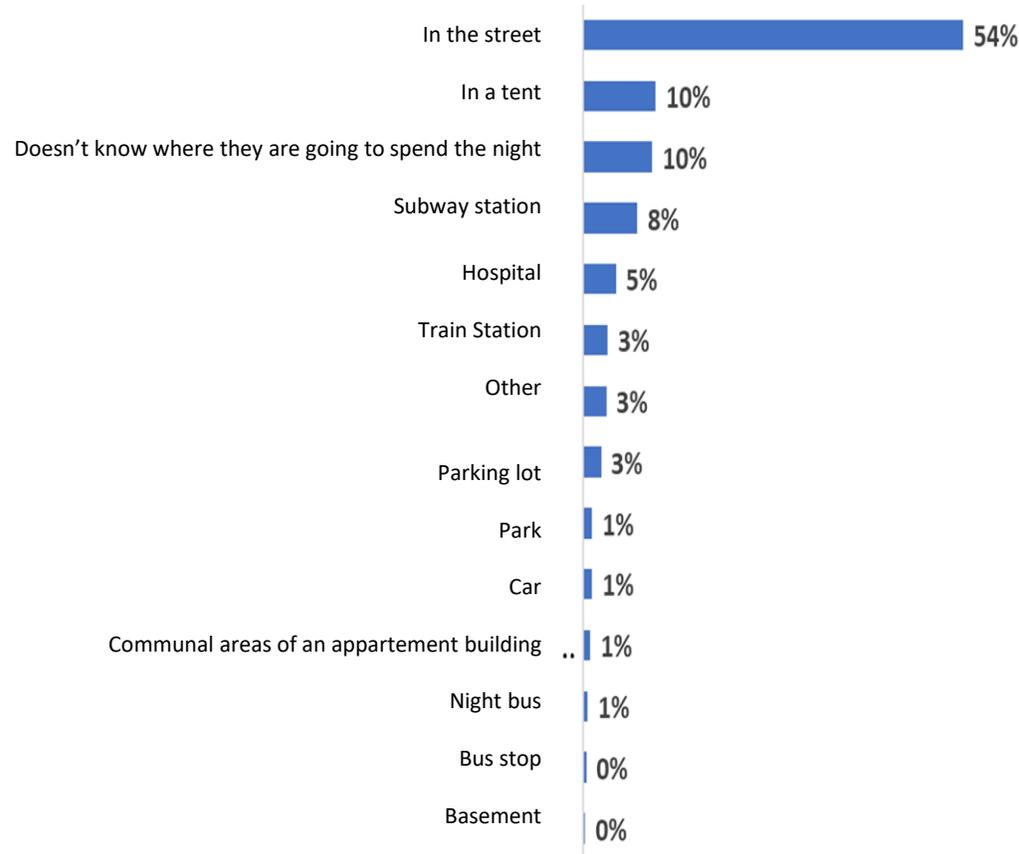

*Increase in street homelessness in the North East districts of Paris*

*While some adjacent areas decrease*

## 4. Most people sleep in the street, a subway/train station or in a hospital

### Sleeping places of homeless people

More than one out of two homeless reported that they would spend the night in the street

79% of respondents said this is the place where they sleep most often

## 5. There are more women sleeping rough than expected and most homeless people never call the 115

**14% are women** (12% in 2018)

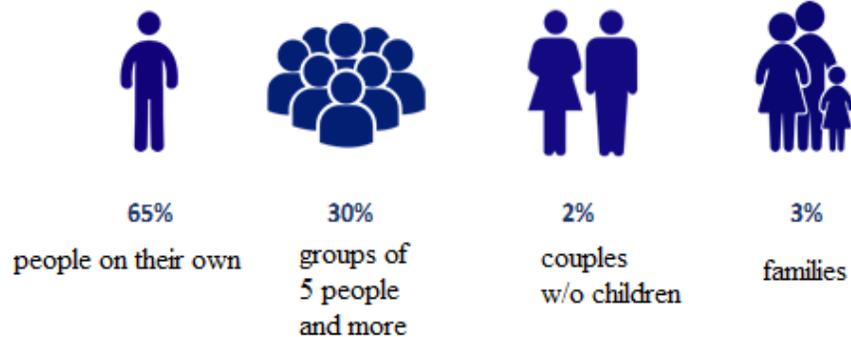

**63% never call 115** (vs 64% in 2018)

[the SamuSocial emergency line]

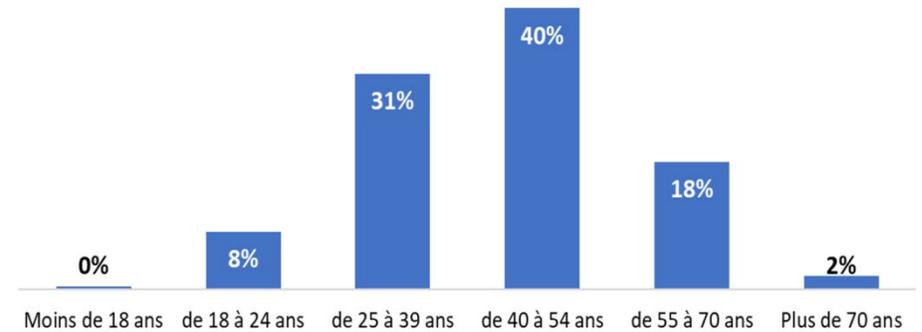

**46% lack sufficient resources**

**14% have resources from a job**

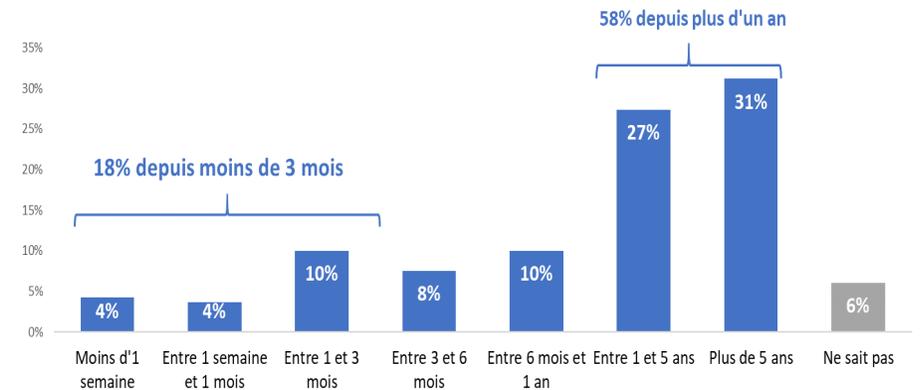

**35% have a case manager** (vs 27% in 2018)

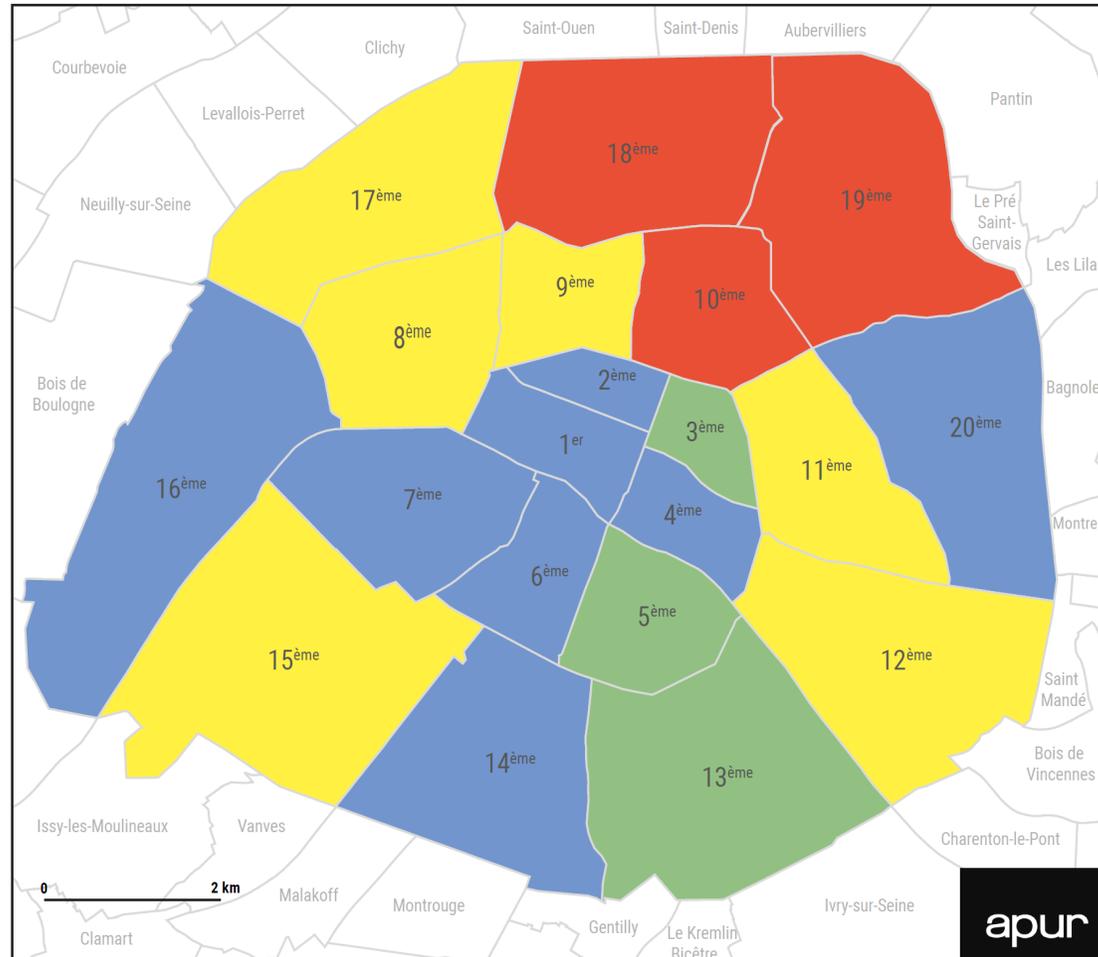

Age of respondents

Homeless since...

## 6. Some profiles are over-represented in certain districts of Paris

### OVER-REPRESENTED PROFILES IN EACH DISTRICT

Using the deviation from the mean methodology.  
Reading: in this district, the profile is overrepresented, although other profiles can also be found.

- Young people (under 25), often in groups, don't know where to spend the night, have no financial resources.
- No specific profile is over-represented.
- The older homeless people, who have been sleeping rough for a longer period of time (1 to 5 y.). Seldom call the 115.
- The homeless people who are most in contact with a case manager and the social services. Aged 25-54. Call the 115 and sometimes sleep in shelters.

Source : Nuit de la Solidarité, Mairie de Paris (février 2019).  
Traitements Apur  
Hors décompte dans les stations de métro et dans les zones spécifiques

## In conclusion, the 2019 edition confirms and consolidates a lot of the findings of 2018

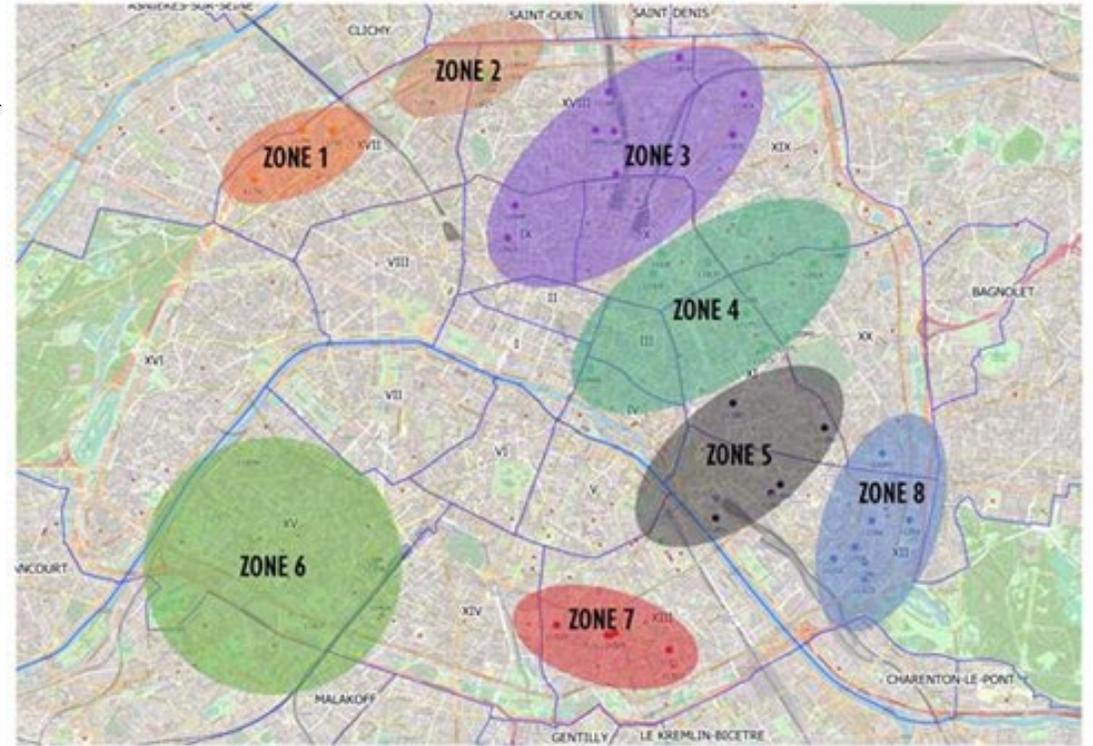

- The overall number of people sleeping rough is, unfortunately, statistically stable
- The majority of our profiles (men/women, alone/couples/families) and statistics (% who calls 115, % sleeping in the street, etc.) are confirmed, while remaining very different from the national figures of 2001/2012
- Some new findings remain unaccounted-for:
  - more people in groups (30% v. 23% in 2018)
  - less young people in the streets (8% v. 16% in 2018)

**02**

**Lessons**

# 1. There's a balance to be found between extending the perimeter and guaranteeing that the results will be understandable by the general public

- *Many areas weren't covered the 1<sup>st</sup> time: in 2019, we extended the perimeter to some parks, parking, social housing, and grassy lots along expressways. →*
- *We met 500+ people in these areas: the more we look, the more people we find*
- *BUT: by doing so, overall figures lose their comparability over time (evolutions can only be measured all else being equal), which makes it more difficult for us, and the press, to accurately communicate on it*

*+ should we count beyond the E1 category (ETHOS)?*

## 2. The survey is extremely useful (perhaps even more than the count), both in terms of research and policy proposal

**Questionnaire personne seule - ENGLISH VERSION**

Arrondissement / Secteur / Numéro de questionnaire  
PS [ ] [ ] [ ] [ ]

Hello, I am [donner son nom], we are volunteers conducting a survey for the City of Paris. For the second year in a row, we are asking everyone we meet in the street whether they have a place to sleep tonight. Our aim is to count homeless persons and to know more about them, so that we can improve the assistance that we provide. This survey is completely anonymous and confidential. If you do not wish to answer, just tell us.

→ **First of all, have you already been interviewed tonight?**  Si oui, ne pas remplir de questionnaire

À remplir obligatoirement [PARTIE 1/2] Observations

**Q1 La personne a répondu au questionnaire**  
 Oui  Non  
 → **Q2 Vous n'avez pas rempli le questionnaire avec la personne car**  
 Elle n'a pas voulu répondre  Elle a évité le contact  
 Elle dormait  Elle ne maîtrisait pas la langue  
 Son état ne lui permettait pas  Vous n'avez pas osé aller à sa rencontre  
 Elle était inaccessible physiquement  Tente occupée mais fermée  
 Autre, à préciser: .....

**Q3 Where are you planning to spend the night?** → Fin de questionnaire

At home	<input type="checkbox"/> Street	<input type="checkbox"/> Subway station (or RER)	<input type="checkbox"/> Railway station	<input type="checkbox"/> Encampment
At a public space	<input type="checkbox"/> On a slope next to the ring road	<input type="checkbox"/> Hospital	<input type="checkbox"/> The woods	
	<input type="checkbox"/> Park / garden			
At another place	<input type="checkbox"/> Single tent	<input type="checkbox"/> Building (hallway, staircase)	<input type="checkbox"/> Squat	
	<input type="checkbox"/> Coach or bus	<input type="checkbox"/> Shopping center	<input type="checkbox"/> Car	
	<input type="checkbox"/> Basement	<input type="checkbox"/> Car park	<input type="checkbox"/> Bus stop / car rental stop (autolib)	
At a hotel	<input type="checkbox"/> Provided to you by the 115 (Samusocial, emergency number)	<input type="checkbox"/> That you paid for yourself		
	<input type="checkbox"/> Emergency Shelter (GHI)	<input type="checkbox"/> Long term shelter (CHRS)		
At a shelter	<input type="checkbox"/> Accommodation center for asylum seekers (CADA)	<input type="checkbox"/> Indoor sports facility		
	<input type="checkbox"/> Safe haven (halte de nuit)	<input type="checkbox"/> Doesn't know which one		
	<input type="checkbox"/> Other, specify: .....			
Hosted by a third party (friend, family)	<input type="checkbox"/>			
Other	<input type="checkbox"/> Specify: .....			
Doesn't know where to spend the night	<input type="checkbox"/>			

**Q4 Is this where you usually spend the night?**  
 Yes  No

**Q5 Will you be sleeping by yourself, or with a group?**  
 Alone  With a group  Doesn't know

**Q6 For how long have you been without a home of your own?**

<input type="checkbox"/> Less than a week	<input type="checkbox"/> Between a week and less than a month
<input type="checkbox"/> Between 1 and less than 3 months	<input type="checkbox"/> Between 3 and less than 6 months
<input type="checkbox"/> Between 6 months and less than 2 year	<input type="checkbox"/> Between 1 and 5 years
<input type="checkbox"/> More than 5 years	<input type="checkbox"/> Doesn't know

**Q7 What caused you to become homeless?**

<input type="checkbox"/> Eviction (from your place, a third party's, etc.)	<input type="checkbox"/> Family separation (split, divorce, etc.)
<input type="checkbox"/> Personal misfortune or setback (unemployment, disease, prison...)	<input type="checkbox"/> End of child welfare services (ASE)
<input type="checkbox"/> Recently arrived to Paris without a home	<input type="checkbox"/> Other, specify: .....

**Q8 When was the last time you slept in accommodation?**

<input type="checkbox"/> Never	
<input type="checkbox"/> Yesterday	<input type="checkbox"/> Less than a week ago
<input type="checkbox"/> Between a week and a month ago	<input type="checkbox"/> Between a month and 6 months ago
<input type="checkbox"/> Between 6 months and a year ago	<input type="checkbox"/> More than a year ago

→ **Q9 What kind of accommodation was it?**

<input type="checkbox"/> Third party (friend, family)	<input type="checkbox"/> Shelter
<input type="checkbox"/> Hotel	<input type="checkbox"/> Indoor sports facility
<input type="checkbox"/> Child Welfare Services (ASE)	<input type="checkbox"/> Prison
<input type="checkbox"/> Hospital	<input type="checkbox"/> Other, specify: .....

- *Repetition is key: the relative similarity in terms of figures hints at the strength and reliability of the method used . It also allows us to make revisions (all the questionnaires were modified and enhanced in 2019).*
- *Truly gives a better, more accurate knowledge of the homeless population, and one that can sometimes even be unforeseen: e.g. the number of people calling the 115, needs of the homeless, etc.*
- *Which allows us to make informed policy proposals*

### 3. Now what? The initiatives launched after the 2018 and 2019 counts

- *3 000 additional shelter beds, with City of Paris bringing land, and national State funding*
- *7 night drop in centers, half of which cater to women and families* →
- *Additional luggage and locker service for persons experiencing street homelessness*
- *Access to rights and benefits : extension of the current municipal « adress and mail » service to triple its capacity*
- *The opening of the Solidarity Factory* →

### 3. Now what? The initiatives launched after the 2018 and 2019 counts

#### *The Solidarity Factory will :*

- *Educate on the reality of homelessness, to combat stereotypes and preconceived notions*
- *Promote projects that align with municipal priorities*
- *Provide training on homelessness and the skills that are useful when serving this population*
- *Help volunteers connect with opportunities or test their own ideas*

#### *It will develop 5 types of programs:*

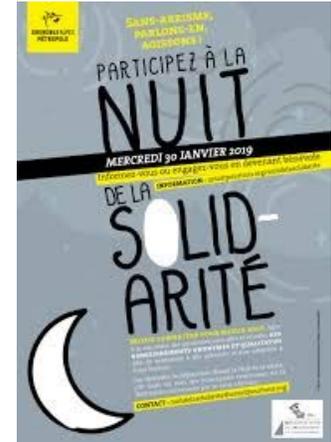

- *Information and training*
- *Connecting volunteers to opportunities*
- *Testing ideas and supporting / incubating projects*
- *Coordinating city-wide service delivery to the homeless population*
- *Arts and creation*

**03**

**Perspectives**

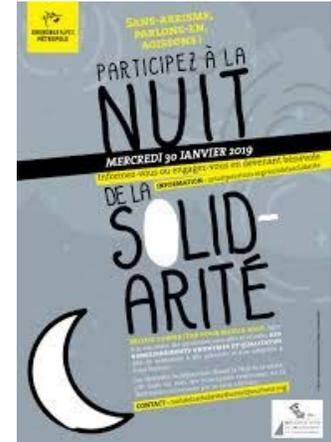

# 1. The New French Street Counts: definitions and objectives

- *The first Parisian street count gave momentum to other cities to organize their own count, with or without the help of the city of Paris: cities like Metz (2018), Grenoble, Rennes, Metz, Toulouse and Montpellier (2019).*
- *This leads to numerous obstacles when trying to compare local surveys:*
  - *E1 category (ETHOS) in Paris*
  - *But Toulouse, Rennes, Grenoble and Montpellier also included squats, emergency shelters (Grenoble, Rennes): a housing exclusion continuum approach*
- *The methodology varies from one French city to the other but in the beginning, there were always the same questions: who should we count, where and how?*

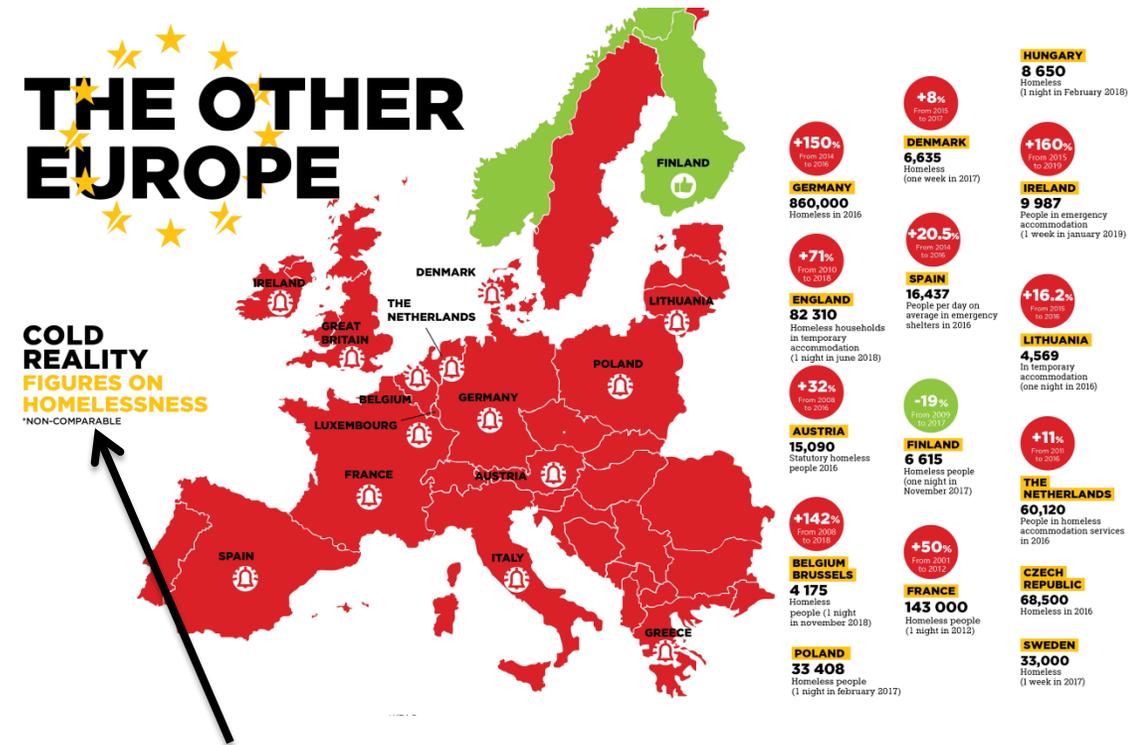

# 1. The New French Street Counts: definitions and objectives

- *The results are also non-comparable because of the differences in terms of questions, timetables and interviewers*
- *Eventually, is comparability the aim of such counts?*
  - *Not necessarily: the counts in themselves can be an objective*
  - *But we still need to move toward a shared reference point/definition*
- *For the municipality of Paris, this renewed interest would be the perfect opportunity to consider organizing a joint count next year simultaneously with other French cities, or even at the European level.*

## 2. Are we (finally) heading towards reliable, comparable European figures on homelessness?

- *Local figures are more accurate and more numerous, thanks to the development of the street count methodology...*
- *... BUT we still need figures at the European level to fully incorporate migration patterns, limit threshold effects, and finally get a comparable, comprehensive overview of homelessness in Europe*

*“non exhaustive and non comparable” (since 2015)*  
source: FEANTSA, Overview of Housing Exclusion

## 2. Are we (finally) heading towards reliable, comparable European figures on homelessness?

### How to get there?

Alison Smith:

- 1) Comparable typologies
- 2) Similar methodologies

---

Can We Compare Homelessness Across the Atlantic? A Comparative Study of Methods for Measuring Homelessness in North America and Europe<sup>1</sup>

---

Alison Smith

University of Montreal, Canada

⇒ *Need for more similar methodologies, all the while keeping the subsidiarity principle : there is no one-size-fits-all solution, as street counts need to stem from the grass roots to mobilize communities.*

⇒ *We need to share our results more, and to hold more workshops on the methodology of street counts*

*Training School for city counts in Europe  
Brussels, September 2018*

## 2. Are we (finally) heading towards reliable, comparable European figures on homelessness?

⇒ *This will allow us to come closer to the European agenda on bringing homeless to a functional zero by 2030*

# Thank you!
